

Worldview®: More Power to Manage Your Risk

With Worldview's real-time access to Chubb's systems and expertise, risk managers are able to take productivity to new heights. To demonstrate, here's a snapshot of what the portal can accomplish for a multinational risk management program – in just 15 minutes.

Find Documents

Check on the status of a Workers' Compensation endorsement for a new Montana facility. Worldview's Document Library shows the endorsement has been issued.

Review Program Activity

Review the latest updates on your Controlled Master Program – including the renewal of a general liability policy issued in Turkey, and the completion of the Anti-Money Laundering form completed by the local broker – all outstanding tasks are complete.

Manage Claims

Review status of open claims on Worldview's interactive dashboard. Several losses have been recently settled. Flag one line of business to monitor more closely - Worldview will send alerts automatically when claims are closed.

Research Global Regulations

Inquire via Worldview's Multinational Research Tool whether a local broker is needed to secure new General Liability insurance in Hong Kong. Get the answer immediately.

Check Premium Adjustments

Look up the latest invoices in the Billing Center. See an open, overdue invoice for a premium adjustment. A quick check of the file reveals an unexpected jump in California auto counts. Initiate discussion in Worldview's Discussion Room with the Chubb team to understand the numbers.

Translate a Policy

Request a translation of the local policy; Worldview will handle it automatically, delivering an English version – and the answer – within days.

Visualize Your Data

Prepare to quickly summarize the status of the global program, or export a program summary visual into a presentation. Off to the management meeting!

Worldview,

the digital risk management platform exclusively for Chubb clients and brokers, provides users greater control, certainty and transparency in managing all aspects of their insurance programs.

Don't Keep Up, Keep Ahead. With Worldview.
