

Protect your home from the #1 cause of loss.

Install a flow-based water leak detection device

At Chubb, we look for ways to do more for our clients. That includes helping you protect your home and valuables and prevent issues from happening in the first place. This is why we're recommending that you install a flow-based water leak detection device, to help keep any potential water leaks from damaging your home or possessions.

How does a water shut-off device work?

Installed by a plumber directly onto your water line, a flow-based water leak detection device monitors the flow of water throughout your home. If an unusual activity or flow of water is detected - probably caused by a leak somewhere in your plumbing or pipes - the device is designed to alert you first and then shut off your water supply to help minimize damage.

We've done the legwork for you.

To make it easier for you, we've researched and vetted the following preferred vendors. Each of them can provide a water shut off device to protect your home from water leaks - at a discount, because you're a Chubb client. You can learn more about each of the referenced devices and even make arrangements to purchase a device, using one of the links below. If you're not sure which one is best for you, contact a Chubb Risk Consultant water specialist at prsriskolutions@chubb.com

Device	Pipe Size	Price**	See how it works, where to find a plumber, and how to purchase at a discount
Phyn Plus	¾", 1", 1.25"	\$600	phyn.com/chubb
StreamLabs	¾", 1", 1.25"	\$849-\$1,049	streamlabswater.com/chubb
Sentinel Leak Defense	¾", 1", 1.25", 1.5", 2', 2'+	\$1,500-\$4,800	leakdefensesystem.com/chubb
