Classes of Customers

The class of customers for who this product is targeted can be categorised as:

- ✓ primary and secondary schools;
- ✓ education providers, (other than primary and secondary schools) on an expectation basis;

of any size that engage volunteers on an unpaid basis to perform low risk voluntary work on their behalf. Examples of low risk voluntary work include transporting students to sporting events or running after-school clubs.

Customer's likely objectives, financial situation, and needs

| | |
|----------------------------|---|
| Objectives | The likely objectives of education providers in this target market are wanting to provide: <ul style="list-style-type: none">• personal accident coverage to their volunteers for while they are performing voluntary work for the school;• coverage for rehabilitation of an injured volunteer. |
| Financial situation | The schools this product is intended for must have the financial means to pay the premium. Covered Persons must have the financial means to bear any relevant excesses and/or waiting periods in the event of a claim, where applicable. Schools in this target market may be privately, or government funded. Schools in a range of financial situations may seek to protect their volunteers against the losses covered by the Product. |
| Needs | The target market includes schools that engage volunteers that likely need cover for those volunteers against non-Medicare medical expenses and/or loss of earnings (from another source) caused by their temporary or permanent disablement following an injury sustained while volunteering to those schools. |

Customers the Product was not designed for

This Product is not suitable for:

- ✗ schools who do not engage voluntary workers;
- ✗ schools seeking personal accident coverage for paid employees;
- ✗ schools seeking to cover their volunteers for high-risk voluntary work such as, firefighting or State Emergency Services;
- ✗ organisations that are not education providers;
- ✗ individuals.

Why the Product is consistent with the Target Market

Chubb views that the Product is consistent with the target market as the target market comprises schools who engage volunteers and the Product provides cover for temporary or permanent disablement resulting

from an injury sustained while volunteering. It is therefore likely that the Product will meet the needs, or go towards meeting the needs, of those in the target market.
