## DigiTech® Enterprise Risk Management

A distinctive level of technology and cyber insurance protection including customizable coverage for Widespread Events

Chubb has handled technology-driven claims and cyber incidents, and underwritten exposures for high-technology policyholders for more than 30+ years. Over this time, the world has become an increasingly interconnected web of technology and data. Today, businesses face numerous cyber exposures that are enterprise risks, which require an enterprise risk management solution: Chubb's DigiTech® Enterprise Risk Management Policy (DigiTech® ERM).

With DigiTech® ERM and Chubb's approach to Widespread Events coverage, businesses can tailor insurance coverage to their unique exposures and needs, providing for greater coverage certainty and also providing long-term stability in the cyber insurance marketplace.

# A three-pronged approach to DigiTech ERM:

- Loss Mitigation Services access to the tools and resources needed to address and gauge key areas of cyber security risks before an event occurs.
- Risk transfer tailored and sustainable coverage backed by Chubb's financial strength.
- Incident Response Services a diverse team of experts in the legal, computer forensics, notification, call center, public relations, fraud consultation, credit monitoring, and identity restoration service areas to help limit exposure to a loss when an event occurs.

### **Competitive Advantages**

- Leading provider of technology and cyber risk solutions since first product was launched over 30 years ago.
- Premiums scale for all sizes of risks based on the scope of coverage and limits.
- Innovative, highly customizable solutions to address clients' unique needs, regardless of size, industry or type of risk.

- Cybercrime coverage by endorsement or explicitly provided under separate cover from Chubb's industry-leading Fidelity and Crime products.
- Cyber Incident Response Expenses with expansive consumer-based solutions that are ahead of regulatory requirements.
- Insurance coverage designed to address evolving regulatory, legal, and cybersecurity standards and built to consider future changes.
- Straight-forward coverage form is aligned with the flow of a typical cyber incident in order to aid decisionmaking throughout.
- Coverage Territory applicable to anywhere in the universe.

### **New Endorsements**

- Widespread Event Endorsement addresses cyber incidents with widespread impact, affecting parties with no relationship to the Insured. Similar to how flood and earthquake risks are addressed in property policies—coverage, limits, retentions, and coinsurance can be tailored for all Widespread Events, or by the following specific perils:
  - Widespread Severe Known
     Vulnerability Exploits
  - Widespread Severe Zero Day Exploits
  - Widespread Software Supply Chain Exploits
  - All Other Widespread Events

- Ransomware Encounter Endorsement addresses the increasing risk of ransomware by allowing for a tailored set of coverage limits, retention amounts, and coinsurance to apply uniformly across all cyber coverages.
- Neglected Software Exploit
   Endorsement recognizes and rewards
   good software-patching hygiene by
   providing full coverage for 45 days, and
   then gradually re-weights risk sharing
   between the Insured and Insurer for
   software that remains unpatched
   beyond 45 days.

## Coverage

## e Synopsis
