Don't worry if you can't find your water shut-off valve, ask for help from your Chubb Risk Consultant, or call a plumber to verify its location and pipe sizes. Hire a plumber who understands flow-based water leak detection to professionally install your new device. Each manufacturer on Chubb's PreferredService Provider Network keeps a list of referrals to local plumbing companies who are trained on their product and provides detailed installation instruction support for locations outside of these areas.

# Measure Your Water Pipe

**While every family member should know how to shut off the water in an emergency, a flow based leak detection device can do it for you.**

- Automatically shuts off water when a leak is found.
- Remotely shutoff water from your smartphone.
- Notification alerts for abnormal water use.

## Protection for when you're home and when you're away!

Install one of the Chubb preferred flow based leak detection devices to give you more peace of mind. You might also qualify for discounts on your policy.

Before making a selection regarding an automatic water shut off device, consider your plumbing system and the various mechanical devices and appliances running on this system. Carefully review these devices and appliances with your licensed plumber or installation professional before installation of your automatic water shut off device. Please consider the potential downstream impacts of shutting off the water to these plumbing system devices and appliances, especially when the water is shut off for extended periods of time. Devices and products described herein are provided by third party vendors not affiliated with Chubb. Chubb assumes no liability or responsibility for products and/or services provided by such vendors. The offer described herein is not an indication that insurance coverage is available under any Chubb policy for any particular incident.
