CSI Country Wide Case Study Safety Strategy Discussion

Construction Safety Investigator

Instructions

The objective of this tool is to provide field supervisors with information to proactively engage workers and discuss safety related concerns that they may encounter. Safety discussions should not be limited to the subject above and should pertain to the activities that workers will be involved in that may have the potential for safety related exposures.

Case Day:

CHUBB

May 2007

Accident Type:

Ladder Accident - Not Secured

Relevant laws, rules and codes may include:

29CFR 1926.20(a)(1), 1926.21(b)(2), 1926.1053(b), 1926.1060

Case:

A carpenter was seriously injured when he fell approximately 30 feet from a ladder.

Accident Detail:

The employee was a carpenter working for a contractor hired to renovate an apartment building's balconies. At the time of the incident, the carpenter was working from an extension ladder that had been fully extended so he could reach a balcony located on the third floor of the apartment building.

While working from the ladder and performing his task, the ladder began to slide sideways along the building. The carpenter tried to steady the ladder but could not and the ladder fell to the ground below.

Reconstructive Safety Evaluation:

- · What are some of the possible causes of the accident being discussed?
- What actions could have been taken that might have prevented this accident from occurring?

Accident Scene Conclusion:

The investigation revealed that the employee failed to tie off the extension ladder once it was raised to the working height and it was set up on an uneven surface. It was also discovered that the employer failed to properly train his employees to recognize and avoid hazards associated with ladders.

Preventive Safety Measures Include:

- All operations are preplanned using a Job Safety Task Analysis (JSTA) to ensure potential safety hazards associated with an operation are identified and appropriate steps are taken to eliminate or control them.
- · Workers should be trained in the hazards of the work they are to perform, the personal protective equipment and safe work procedures necessary to perform their assigned tasks. This includes training on the type of ladder the worker will be using and necessary safety precautions.
- Extension ladders should be secured at the top to prevent them from tipping over when in use or being displaced by work activities or traffic.
- Ensure ladders are only set up on stable and level surfaces.

Attendance Roster	

Reference: This case is fictitious, and any resemblance to any persons, living or dead, is entirely coincidental. However, the type of accident described in this case summary happens all too often on construction sites.

Chubb. Insured.[™]

Chubb is the marketing name used to refer to subsidiaries of Chubb Limited, providing insurance and related services. For a list of these subsidiaries, please visit our website, www.chubb.com. Insurance is provided by ACE American Insurance Company and its U.S. based Chubb underwriting company affiliates. All products may not be available in all states. This communication contains product summaries only. Coverage is subject to the language of the policies as actually issued. Surplus lines insurance is sold only through licensed surplus lines producers. Loss control evaluations, reports, recommendations and services are made solely to assist the insurer in underwriting and loss control and are not to be construed as an added benefit for the insured, property owner or any other party (this may not apply if loss control services are purchased separately and specifically pursuant to a service agreement). Evaluation for any hazard or condition does not imply that it is covered under any policy. Chubb is the world's largest publicly traded property and casualty insurance group. With operations in 54 countries, Chubb provides commercial and personal property and casualty insurance, personal accident and supplemental health insurance, reinsurance and life insurance to a diverse group of clients. Chubb Limited, the parent company of Chubb, is listed on the New York Stock Exchange (NYSE: CB) and is a component of the S&P 500 index.
