A close-up, low-angle shot of a server rack. The perspective is looking up at the rows of server units, which are densely packed and feature a perforated metal front panel. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and scale. The word "CHUBBER" is overlaid in the center in a clean, white, sans-serif font. A registered trademark symbol (®) is positioned to the upper right of the final letter. The overall aesthetic is industrial and modern.

CHUBBER®

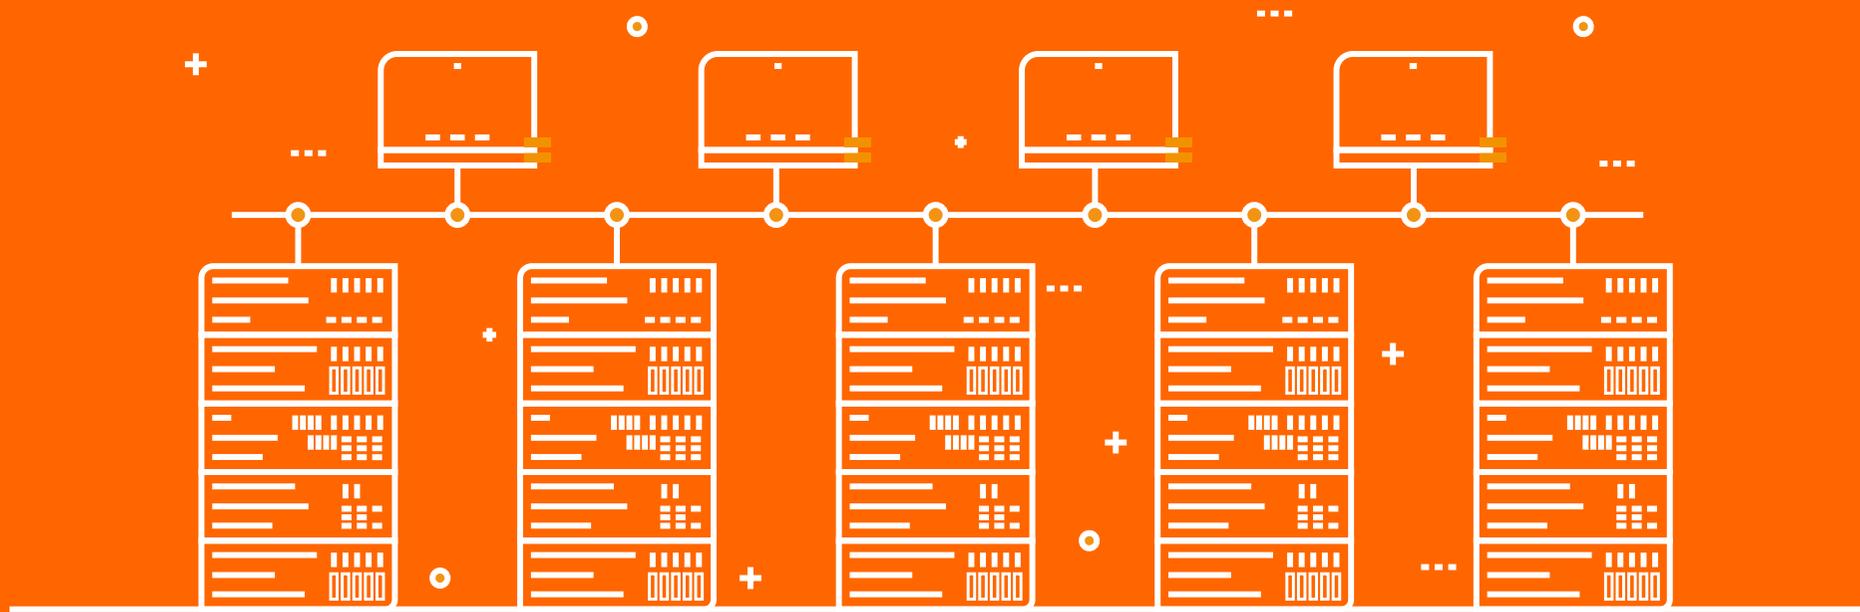

Chubb Cyber Risk Engineering

Chubb's Cyber Enterprise Risk Management offering is an end-to-end risk management solution, from pre-inception surveys and loss mitigation services to immediate incident response when a cyber event occurs. It has been designed to cover the needs of companies of all sizes, from middle-market businesses to multinationals, across Europe.

Dedicated risk engineering is a critical element. Our team of risk engineers in the UK and Continental Europe provide clients with added value risk engineering and loss mitigation services.

Cyber risk engineering is a highly technical, rapidly evolving practice requiring specialised expertise. How each client operates and the technology they use can be different in every circumstance. We help clients identify and understand their technological vulnerabilities and assist them in preventing a future cyber incident even before a policy incepts.

Our Risk Engineering

- Our risk engineers engage directly with clients to gain a deep understanding of the risk and exposures
- We offer the flexibility for engagements to occur either pre-bind or on-risk
- Clients receive risk recommendations that include guidance on how they can improve overall cyber risk management profile
- Direct technical training is available to clients and brokers as well

Chubb's Three Core Risk Engineering Services

Risk Evaluation

We gather and verify data on the client's business to fully understand the threats, controls and potential impact of losses; from the regulatory environment through to business interruption.

We do this primarily with onsite surveys, which we can provide pre-bind, at renewal, or even mid-term if the client's exposures change.

If an onsite survey isn't practical for the client we can complete a telephone interview or desktop study.

Risk Management

We work with clients to reduce exposures, improve risk controls and tackle claim activity, where necessary, by recommending risk improvements.

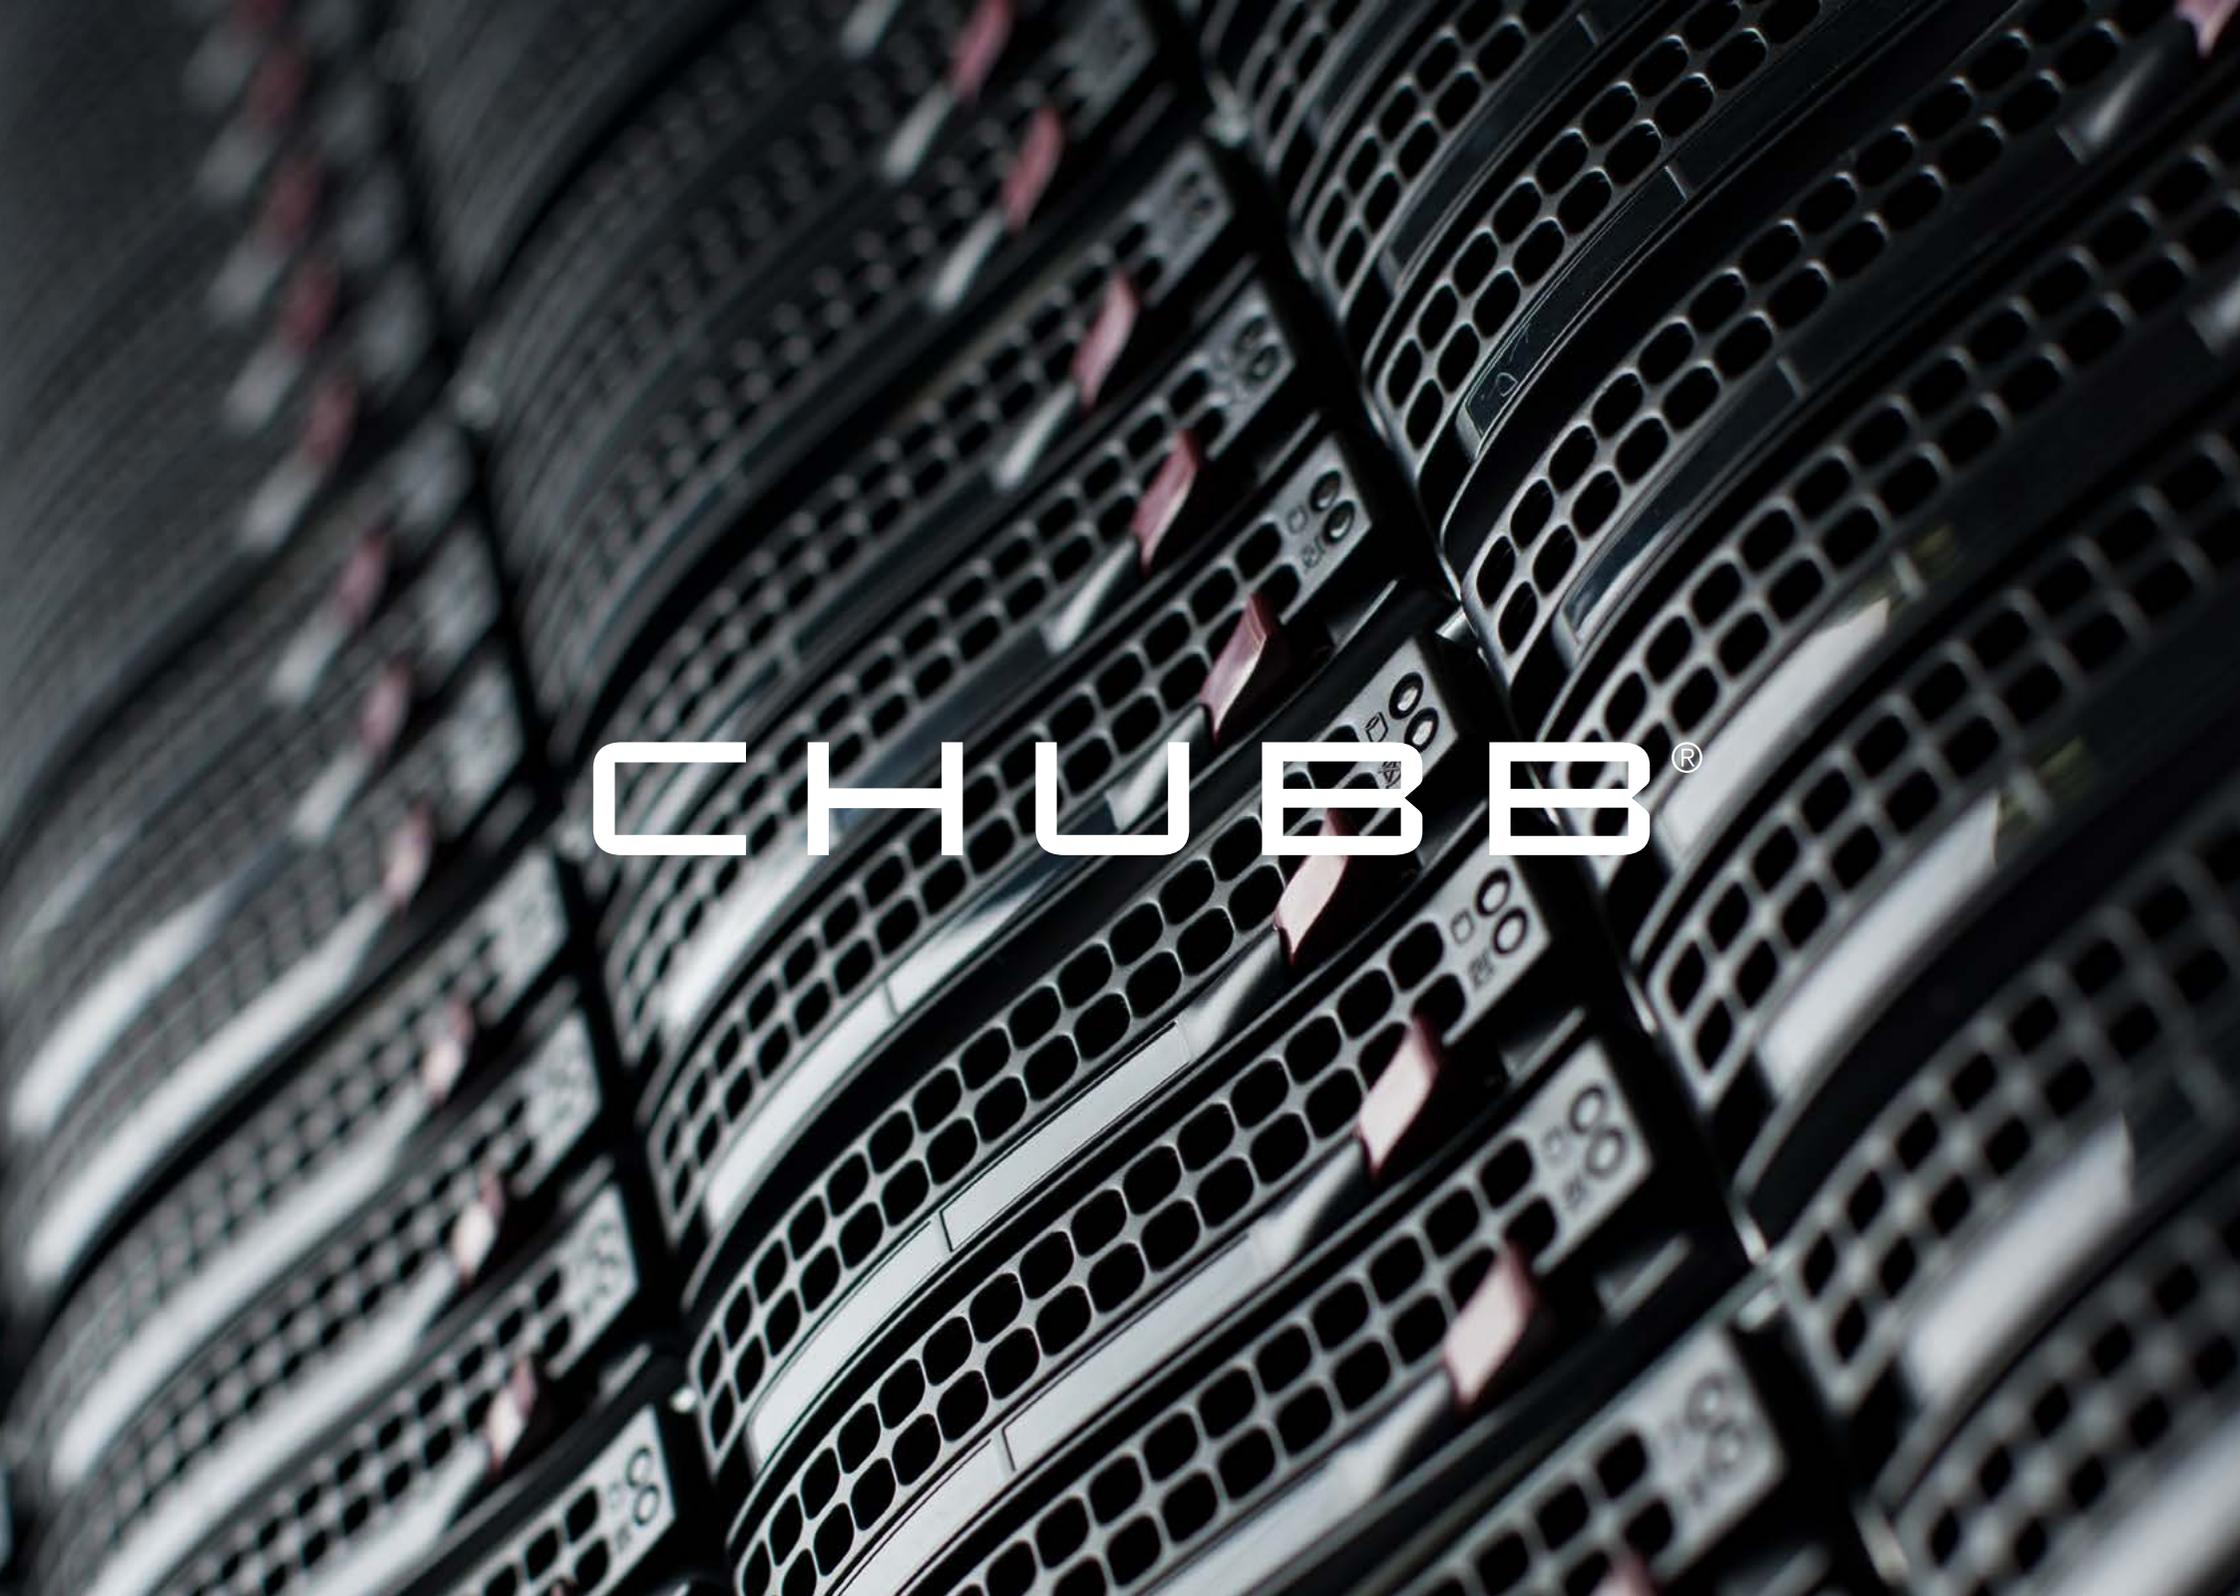

Risk Partnership

We provide additional services to meet identified client needs and can provide advice, education and training in specific areas of the business. These services help to complete Chubb's holistic cyber risk management solution.
