

Chubb Risk Consulting

SERVICES FOR Entertainment Clients

The Entertainment industry is highly unique and is exposed to wide-ranging risks that aren't found in traditional businesses. Whether it's protecting cast and crew on an 'on-location' feature film or ensuring patron safety during Broadway theater performances, there is a duty of care that must be realized to protect people, property and business continuation. The goal to ensure "The Show Must Go On" in a safe and effective manner, Chubb Risk Consulting offers tools, resources, and specialization to provide solution-oriented products and services.

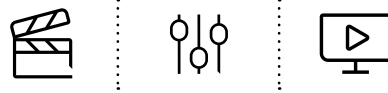

We craft pragmatic solutions with our insureds and offer recommendations to help minimize loss potential.

Chubb's risk consultants take the time to understand each production to align service strategies with its business needs.

Our [Chubb Risk Consulting Library](#) offers a one-stop shop for risk management resources, while the [Chubb Risk Engineering Center](#) is fully equipped and staffed to deliver loss mitigation training across multiple lines of business and offers courses specifically tailored to address the unique risks faced by clients. Our Center is dedicated to providing advanced and collaborative educational resources, ensuring clients can access the latest tools and knowledge specifically designed to help manage their risks effectively.

Services Available to Clients

Services can be provided based on mutually agreed upon program structure and can be delivered on a bundled or direct sold service basis.

Property, Resilience and Equipment Breakdown

Boiler and Pressure Vessel Jurisdictional Inspections	Pre-fire Planning Consultation for On-location Activities	Natural Catastrophe Risk Assessments including Wildland Fire, Flood, and Hurricanes
Vacant Building On-location Set Risk Assessments	Fire Protection System Evaluations	Building and Site Security and Theft Prevention for Rental Houses and On-location Laydown Yards
Hot work Program Development and Auditing	Electrical Preventive Maintenance Program Evaluations	Onsite Infrared Scanning of Electrical Systems
Adverse Weather Contingency Planning	Environmental Site Assessments	Physical Risk Analysis for Resilience
Historical and Architecturally Significant Building Surveys	Stream Labs Water Risk Mitigation Solution	

Worker Safety

Stunt and Pyrotechnics Risk Assessments	Mobile Equipment, Ladder and Scaffolding Safety Training and Maintenance Programs	Consultation and Remediation Services including Fire Life Safety and Hazardous Activities/Conditions, both for Existing Venues and On-location Filming
Regulatory Safety Program Gap Assessment such as OSHA, NIOSH, and State-based requirements (eg – NYS CR59)	Script Reviews and Onsite Production Meeting Safety Consultation	Ergonomics Assistance to Prevent Repetitive Motion and Lifting Strain Injuries to Carpenters, Stagehands and Performers
Industrial Hygiene Services, including Air and Noise Monitoring	Fall Protection Assessments, both from Elevated Heights and Horizontal Walking Surfaces	Safety Committee Program Development and Participation
Site Safety assessments for Load In/Load Out for stage and on location		

General Liability

Patron/Public Life Safety Risk Assessments	Traffic Management Gap Analysis	Security Vulnerability Assessments
Pre-Shoot Scouting to Prevent Risk to Public, Cast, and Crew	Contractual Risk Transfer Consultation	Performance Disruption Risk Guidance, including Environmental Site Assessments for Mold and Asbestos

Auto Liability

Fleet Safety and Regulated Vehicle Management Industry Benchmarking	FMCSA Program and Compliance Review for Regulated Trucking Activities	MVR (Motor Vehicle Record) Program Development
National Safety Council (NSC) Defensive Driving Training Courses	Customized Driver Training Offerings, including Modules on Distracted Driving, Load Securement, and Other Safety Topics	Incident Investigation and Program Review
Fleet Safety Program Review	Telematics Program Assessment and Alert Trending	

Examples of Success Stories

Film Producer	<p>A film producer engaged Chubb Risk Consulting to evaluate a scene involving flame effects in an interior set built within a rented studio space. During a thorough review and safety assessment, Chubb identified a critical prevention measure that had been overlooked: the studio was equipped with ventilation systems that needed to be turned off before igniting any fire effects. Failure to do so posed a significant risk of fire spreading throughout the building and triggering the sprinkler system. In collaboration with the local fire department, our team ensured that all necessary safety measures were implemented, effectively mitigating property and liability exposures associated with the flame effects. This proactive approach not only protected the studio and production assets but also contributed to a safer environment for the cast and crew.</p>
Performing Arts Venue	<p>Chubb Risk Consulting conducted a thorough property risk assessment at a performing arts venue that operates as a live theatre. During their evaluation, they identified significant vulnerabilities related to potential water damage and the consequential risk of business interruption stemming from various water sources within the facility. In response to their findings, the team recommended the implementation of a robust water damage mitigation plan, which included the installation of a state-of-the-art water detection system. The insured promptly acted on the recommendation and installed the water detection system. This decision proved to be invaluable when, shortly thereafter, a failure in an expansion tank occurred in the middle of the night. The early warning provided by the detection system enabled the insured to mitigate the impact of the water damage claim, preventing extensive damage and minimizing disruption to operations.</p>

Lower Your Risk Today with Chubb Risk Consulting

Our team of world-class industry professionals is readily available to partner with your business to help mitigate the risks you may face. Contact our team below to explore how we can help you manage risks more effectively.
