CHUBB®

Chubb Risk Consulting

SERVICES FOR

Membership and Trade Association Clients

Membership Organizations and Associations serve to unite groups of people together for a specific purpose, such as connecting people with common beliefs, bringing together those with a common profession, among other reasons. Thousands of these groups exist, with the number growing substantially every year. That growth presents risks from an insurance perspective, as these groups may face obstacles that challenge their effectiveness. Chubb provides customized solutions to help associations focus on their mission, increase membership recruitment and retention, and grow.

Chubb Risk Consulting offers tools, resources, and specialization to provide solution-oriented products and services. We craft pragmatic solutions with our insureds and offer recommendations to help minimize loss potential. Employing a network of nearly 500 global risk engineers and more than 120 risk specialists, with decades of experience, Chubb's risk engineers take the time to understand each company to align service strategies with its business needs.

The Chubb Risk Engineering Center is fully equipped and staffed to deliver loss mitigation training across multiple lines of business and offers courses specifically tailored to address the unique risks faced by clients. Our Center is dedicated to providing advanced and collaborative educational resources, ensuring clients can access the latest tools and knowledge specifically designed to manage their risks effectively.
