

**BREAKING ALERT:**

Chubb Vulnerability Alert System - “CVE-2026-20127 Cisco Multiple Products”

Chubb provides alerts to keep our policyholders informed of risks that may affect their organizations. Cisco recently disclosed several critical severity vulnerabilities, [CVE-2026-20127](#) (affecting Catalyst SD-WAN Controller), [CVE-2026-20133](#) and [CVE-2026-20129](#) (affecting Catalyst SD-WAN Manager) [CVE-2026-20079](#) and [CVE-2026-20131](#) (affecting Secure Firewall Management Center). Exploitation of these vulnerabilities could allow remote attackers to execute arbitrary code. Active exploitation of these vulnerabilities has been observed in the wild.

Cisco has [released details](#) on the potential impact and advises those affected to patch their systems to mitigate the risk.

Chubb’s Cyber Risk Advisory Team is available to answer your questions and help mitigate cyber exposures like the one described above. To request advisory services, please [click here](#).

For additional information on Chubb’s advisories, visit Chubb’s cyber threat intelligence [website](#) or please contact cyber@chubb.com. You may also use Chubb's interactive tool [Chubb Cyber Index](#)® to access additional resources to help evaluate and address cyber risks your business may face.
