

# Chubb Global Learning Centre - Managing Risk in the Most Innovative Way

CHUBB®

Increasing globalization, new business models, changing technology, and evolving risk management approaches – as you face these challenges, our new Chubb Global Learning Centre can bring these exposures, and how to manage them, to life with hands on training in the most innovative way possible.

The new Chubb Global Learning Centre (Chubb GLC), located in Branchburg, NJ is a 14,000 square foot, state of the art, green facility dedicated to expert training – fully equipped and staffed to deliver loss mitigation training in a safe and controlled environment. Our mission is to help companies, employees, municipalities, and business partners reduce the risk of loss and strengthen strategies to keep operations safer and more profitable.

## **Global Knowledge & Application**

---

Chubb GLC provides cutting edge risk engineering learning and development solutions globally through direct and distance education. We recognize that staff, clients or business partners may be located all over the world. Our facility is equipped with modern audio visual systems, allowing training sessions to be attended live in person or viewed remotely from anywhere in the world – with the ability for recorded playback features with subtitles for easy accessibility anytime.

## **Innovative Solutions**

---

Innovation begins with people. People who are passionate about learning, solution oriented, professional and connected. Chubb's Risk Engineering team helps companies minimize losses – from sprinkler system testing to worker safety to cyber risk mitigation – through a mix of classroom and live demonstrations.

14,000 square  
foot one stop,  
state of the art,  
green facility

#### Local Focus - Partnering with our Community

---

Chubb Risk Engineering believes that local community involvement with police departments, schools, fire departments, and other local stakeholders is essential in building and promoting a culture of learning, safety and awareness. Chubb has a long standing history in the NJ area and a vested interest in the value and care for the community. Through discounted programs for our local community, we can work together to make learning more relevant through real world application and ultimately achieve safety goals and benefits for our local community.
