## Good to know: Insurance hurdles that delay home closing

### The home isn't insurable

If the previous homeowner made an insurance claim (such as for severe water damage or mold losses), it will show up on their insurance reports and insurance companies may decline to cover the home because it is too much of a risk. Chubb agents can help find creative solutions and work with your clients to help find coverage.

### Homes in high-risk areas

Loans for homes in high-risk areas may require hazard insurance in addition to a standard homeowner's insurance policy. Chubb agents understand the unique exposures in all types of areas, including high-risk areas like those in a wildfire, hurricane, or flood zone, know how to manage these risks, and will help navigate the appropriate coverage options.
