

Historical Crediting Interest Rates of Universal Life Insurance Plans

Date: 31 March 2026

The following table shows, for the reporting year 2025, the historical crediting interest rates for the universal life insurance plans issued by the Company since 2010 and they still have policies in force in the reporting year 2025. The information is intended for reference only. The historical rates are not guaranteed and should not be taken as indicator of future crediting interest rates of the Company's universal life insurance plans. The future crediting interest rates may be lower or higher than the historical rates as listed.

Historical crediting interest rates for universal life insurance plans are as follows:

Remarks:

- Crediting interest rates shown are before any relevant policy charges.
 - Crediting interest rates shown are calculated based on weighted average of actual crediting interest rates of the policies in each calendar year.
- * The crediting interest rates reflect the 1% difference in crediting interest rate for the first 2 policy years and subsequent years as well as the adjustment in crediting interest rate (if any).
- ^ The crediting interest rates reflect the 1.2% difference in crediting interest rate for the first 2 policy years and subsequent years as well as the adjustment in crediting interest rate (if any).
- # The crediting interest rates reflect the 0.95% difference in crediting interest rate for the first 2 policy years and subsequent years as well as the adjustment in crediting interest rate (if any).

The “Company” herein refers to Chubb Life Insurance Hong Kong Limited, which is authorized by the Insurance Authority to carry on long-term insurance business in the Hong Kong Special Administrative Region.
