Protect your home with the latest technology.

In partnership with Chubb, we are always looking for ways to do more for you. That's why, as new innovations in home protection become available - like the latest technology to help prevent water damage - we make sure you know about them. That way, you won't have to worry about leaks or water issues, and can rest assured that your home will be dry and comfortable, even when you're not there.

Stop water damage before it happens

Water damage occurs more often in homes than fires or burglaries, and it's not typically from natural disasters. Most water damage is from leaking or bursting pipes or other plumbing issues throughout the home, often happening when the homeowner is away. The average 2-1/2 bathroom house has 13 plumbing fixtures - including toilets, sinks, showers, bathtubs, washing machines, ice makers, and more - and, as the fixtures age, the likelihood that at least one of them will fail increases.

Many homeowners like you are taking advantage of smart home technologies to prevent water damage. The latest devices include sensors and water shut off valves that automatically detect leaks and shut off your main water supply if necessary, then notify you of the problem.

One such device is the Sentinel Hydrosolutions Leak Defense System. Chubb has negotiated a 35% discount for their clients, to help them prevent water damage. In addition, you may be eligible to receive up to 8% homeowners' insurance discount*, because these systems reduce the risk to homes.

Ready to protect your home from water damage?

To learn more about what you can do to prevent water damage before it happens, reach out in the way that's most comfortable for you:

- Contact our office at [555-555-5555].
- Contact Sentinel Hydrosolutions at a Chubb dedicated number 855-422-3426.

Sincerely,
