

Construction Safety Consulting

CHUBB®

A strong safety culture is key to preventing construction accidents, reducing injuries and promoting a safe jobsite. A commitment to safety should be an essential component of every construction project, from planning through completion.

CGRA's Approach

The Construction safety and health consultants from Chubb Global Risk AdvisorsSM (CGRA) provide a “hands-on” approach to handling construction and construction related loss control activities.

CGRA partners with clients by becoming an asset to their management team. CGRA's objective is to understand each client's operations and goals to develop solutions for their unique situations and the ever-changing construction environments to help eliminate accidents, reduce downtime and enhance a culture of safety.

Our team consists of experienced and highly credentialed members that are trained in the safety and insurance environment and focus on all levels of risk that have an effect on your bottom line.

Comprehensive Service Offering

CGRA's construction safety services include:

- Implementation and auditing of Health, Safety and Environmental (HSE) programs

Chubb Global Risk Advisors

High Standards Drive High-Quality Programs

CGRA's best practices philosophy helps drive consistent, high-quality services. As part of these best practices, Chubb advises that clients:

- Clearly communicate safety responsibilities from project executive to supervisory staff to the field
- Clearly outline safety responsibilities for contractors and subcontractors in their contract documents
- Provide effective and documented employee orientation
- Conduct pre-construction/ pre-planning meetings for trades/tasks considered high exposure
- Proactively complete a job hazard analysis and develop safety procedures
- Provide training and re-training
- Perform regular safety audits and track actions to completion
- Maintain a “zero-tolerance” philosophy for unsafe practices
- Adopt a “keep-it-simple” mindset
