Harvesting power from renewable sources, creating energy efficiency, and addressing the scarcity of natural resources are just a few of the evolving challenges Clean Technology companies face. As global energy demand increases and supply chains become more complex, new risks emerge. With more than 30 years dedicated to Clean Technology, Chubb has the expertise to craft holistic insurance solutions to address this evolving industry.

Industry Expertise

- Chubb’s “Sustainability Suite” provides custom solutions for Clean Tech companies by including endorsements for R&D Property and Business Income, Green Upgrade, and Pollutant Clean-up or Removal
- Experienced underwriters work closely with producers and clients to develop a deep understanding of each client’s unique operation in order to deliver a customized, integrated solution
- Capabilities to craft tailored solutions for a wide range of risks from R&D, early stage to full commercialization
- Solutions adapt to the changing needs of Clean Tech companies based on insight gleaned from industry associations and survey results from various CEOs across North America

Target Classes

- Renewable energy producers
- Manufacturers supporting clean technologies
- Software and hardware companies supporting clean technologies
- Energy efficiency and smart grid
- Advanced materials
- Air and environment
- Clean transportation

Service Offerings

- Claims professionals with significant experience in and knowledge of Clean Tech claims and litigation
- Forward-thinking, highly specialized risk engineers that understand the Clean Tech industry, are devoted to continuous learning, and aim to find opportunities to help protect companies before a loss occurs
- Cyber-physical and cyber-digital security risk assessments and subsequent evaluations for networked systems
- Photovoltaic solar fire mitigation
- Energy Storage System protection
- Worldview provides risk managers and brokers access to Chubb systems and expertise in one easy-to-use application
- Global capabilities to protect operations and exposures through one of the largest networks of owned, local branches throughout the world
- Infrared thermography analysis to identify hot spots without disrupting electrical service or business operations
### Integrated Solution
Scalable and modular insurance products for risks specific to your business.

#### What have we written lately?

</table>

#### What have we paid lately?

- A Clean Energy Solutions company’s equipment malfunctioned, ignited, and caused a fire damaging prototype equipment on their assembly floor and R&D lab. Chubb quickly responded to the claim impacting Property, Business Income, and R&D Business Income.

- A U.S.-based Clean Tech company contracted with an overseas software vendor. The vendor did not properly protect administrator defaults on their server and a hack for hire exploited the vulnerability and threatened to post records with information from millions of registered users. Chubb responded to the extortion expenses and payments.

- A windstorm ripped newly added solar panels from their foundation damaging some and completely destroying others at a utility-scale solar farm. The Chubb claims specialist, with expertise in solar power equipment, responded and reimbursed the client within two days of the storm.
