

Cyber Central - Batch Quoting

Less data inputs. More wins

Cyber Central is designed to save you time while quoting new business, serve up qualified leads, and make it easier for you to engage with your clients.

Batch quoting allows you to quote multiple accounts at once! Upload 30 or more accounts at once for batch indications or batch quotes – making book rolls and consolidations easier.

How does it work?

Simply download our spreadsheet, fill in the required information, and upload it to the site. A Chubb representative will contact you within two business days to discuss your quoting goals. The representative can give you pricing indications* or can create bindable quotes in Cyber Central or Marketplace. Here, you can then create quote proposals or request to bind.

Let's Get Started

Select how you'd like to begin so we can help meet your client's needs.

Batch Multiple Quotes
Simplify book-rolling or consolidation with quotes for 30+ new business accounts at once.

If your information is in order, your Chubb representative will return your spreadsheet to you with indications or quote prices (depending upon your goals) and the likelihood of the account to refer, decline, or automatically quote. Pricing will include any surcharges, applicable taxes, or fees. If a bindable quote is returned to you, you will also be able to see your full quote, including endorsements and the ability to generate individual quote proposals, in the quoting platform.

What to expect once you submit a batch quoting spreadsheet:

- Any indication or any quote returned to you will be based on the information you provided Chubb. If you change any information during quote conversion, such as the effective date, pricing and terms are subject to change. Indications are not a bindable quote and are subject to additional underwriting verification.
- Indications and quotes will assume a 12 month policy period.
- Indications are not reserved. If you would like to reserve this business for your agency or brokerage, please speak with your Chubb representative about bindable quoting.
- Batch indications and batch bindable quotes will include the assumption that the most favorable underwriting controls are in place for each organization, including (but not limited to) having multi-factor authentication in place for corporate email or on their corporate network, systems, and VPNs, and having had no losses.
- Agents are responsible for editing bindable quotes to correctly reflect the controls the organization has in place.
